

REAL NOTE

Press Kit

"RealNote is a social network where users post digital content to the real world like virtual graffiti."

Through the power of AR you can post a text, images or 3D models anywhere in the world. Other users can see the content exactly as it was left behind. In this hyper local network, the creativity of our users expands the world around you!

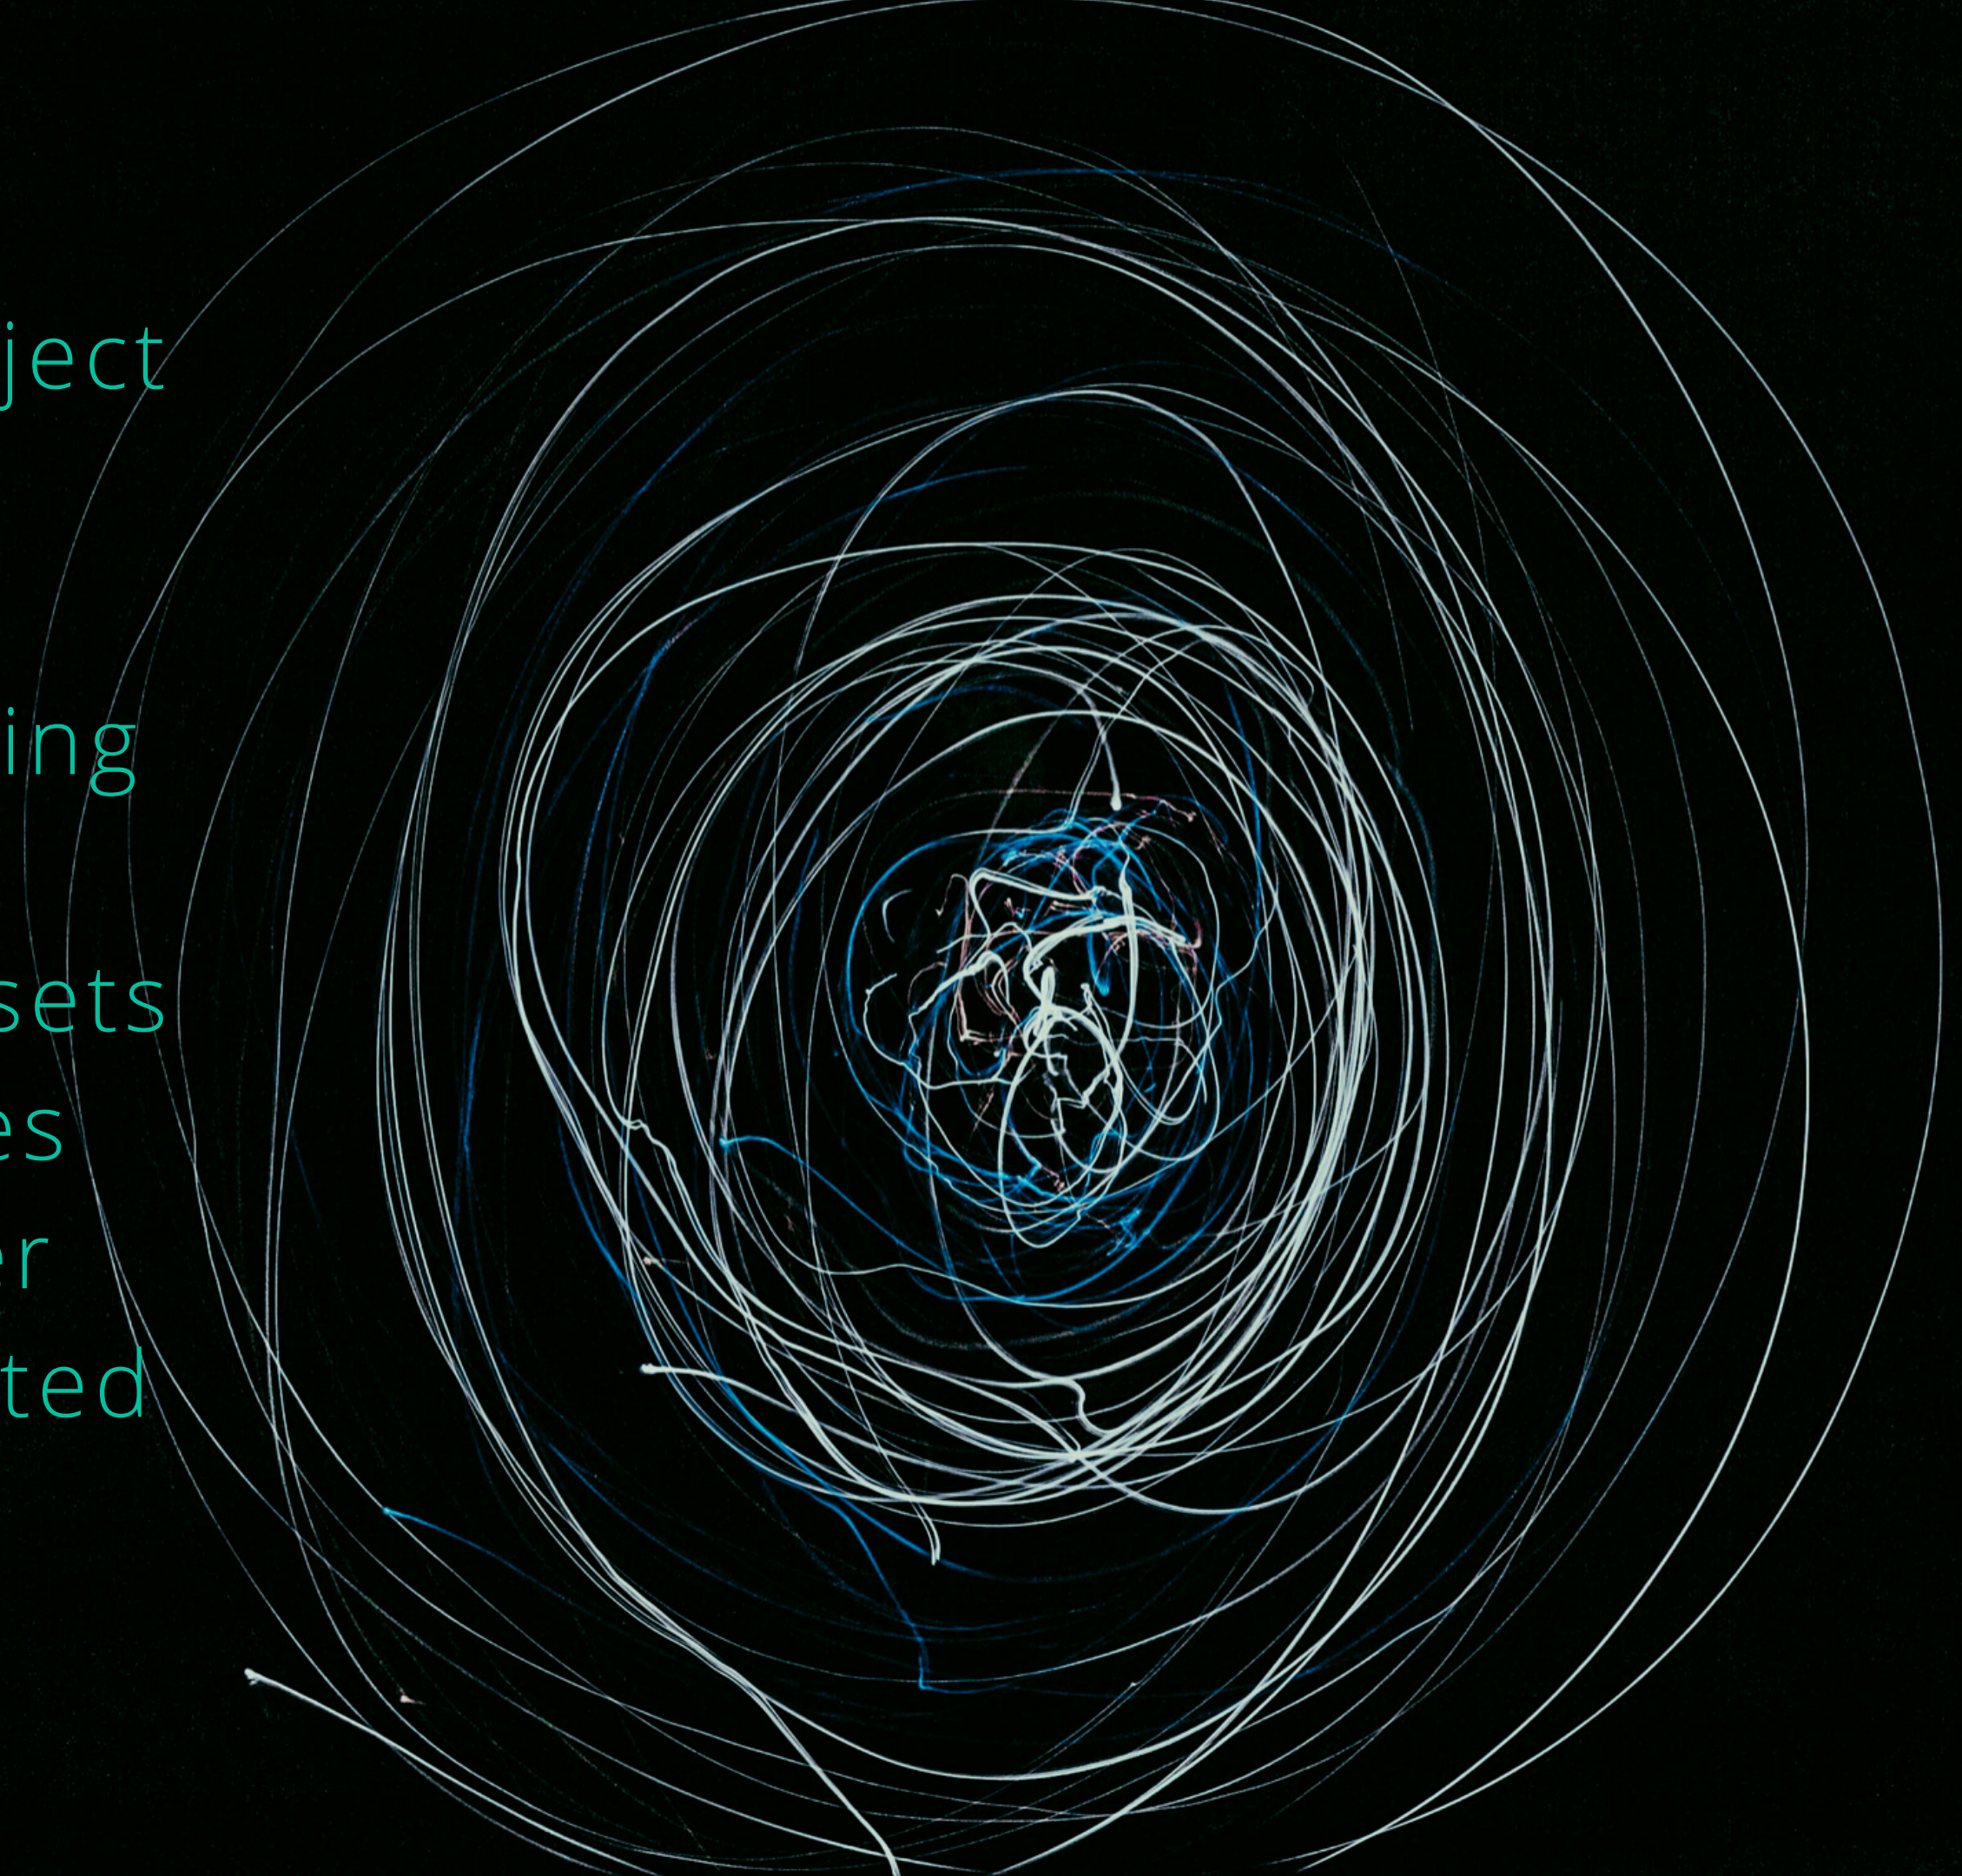

RealNote was
downloaded over
100.000 times on
Android alone.
There are currently
over 50.000 notes
in 184 countries.

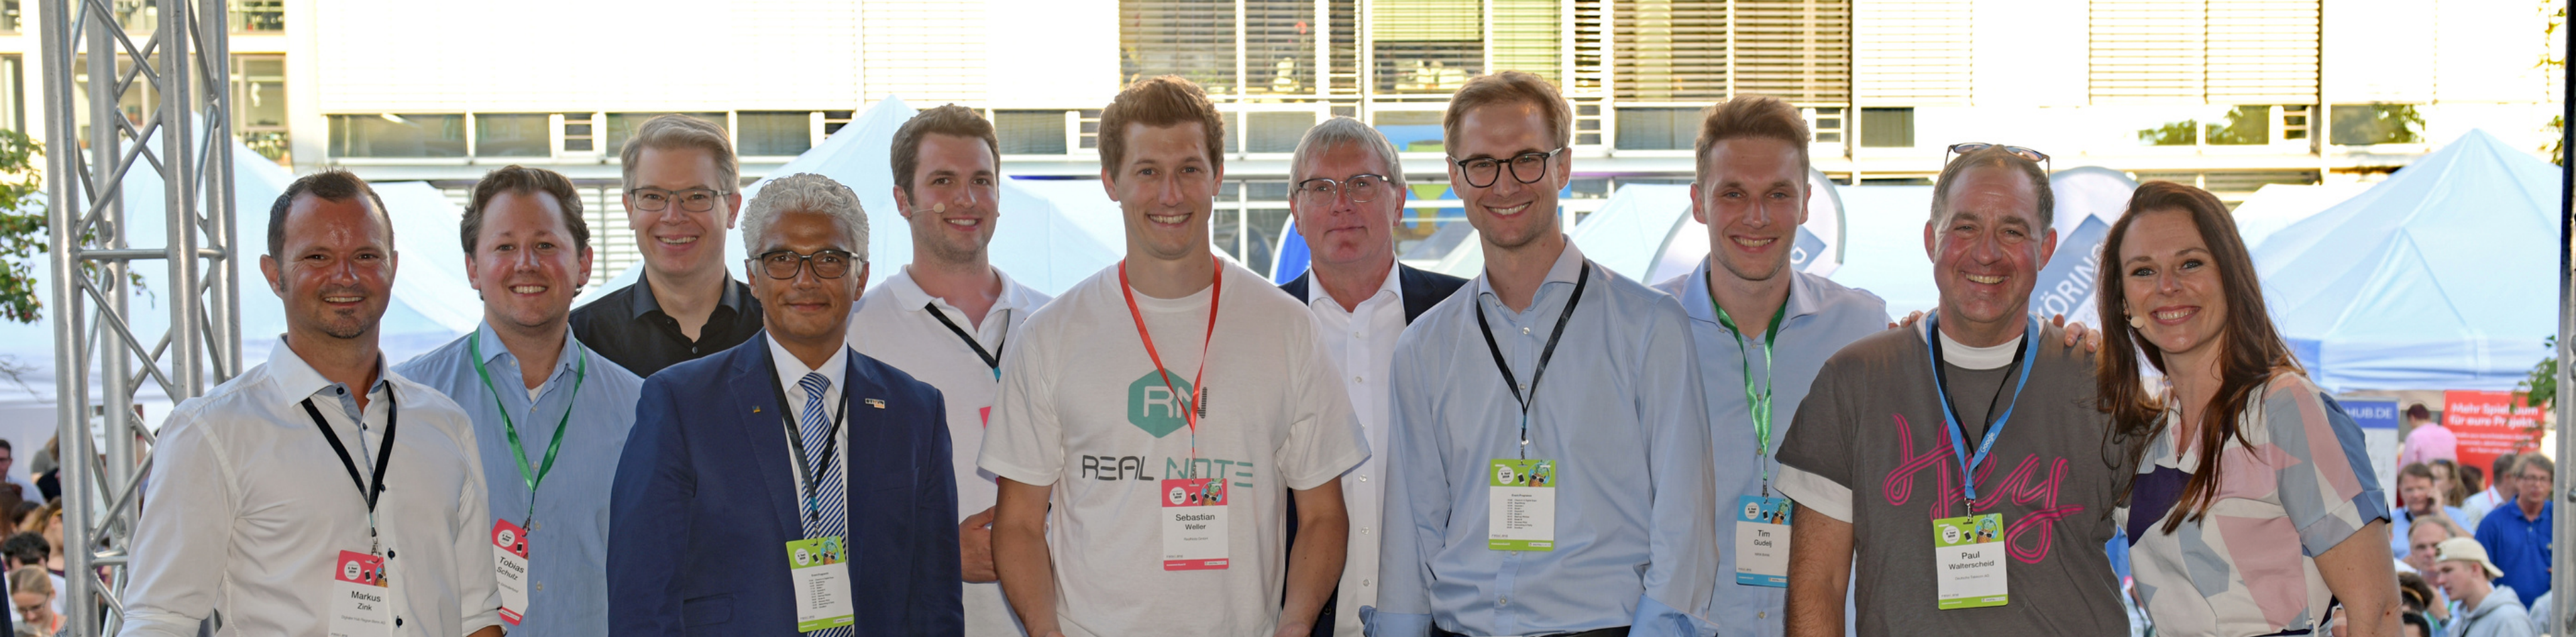

RealNote will be released for iOS in early 2021. With the release features like AR drawing and 3D Text will also be included for Android and iOS.

Our ultra-lightweight object detection is capable of precisely detecting, comparing and recognizing any surrounding in realtime. This approach sets us apart from the masses and enables us to deliver truly persistent Augmented Reality.
